The closest prior art, Kishimoto (U.S. Patent No. 6,072,557) discloses a color liquid crystal display having a first substrate, a second substrate, an electro-optical material interposed between with a plurality of projections between adjacent pixel electrodes.

However, Kishimoto does not teach the liquid crystal between adjacent electrodes which are driven by mutually opposite polarity voltages having a thickness thinner than a thickness of the liquid crystal between adjacent pixel electrodes which are driven by same polarity voltages.
